

Gas Station Requirements

All gas stations are considered service stations obligated to perform basic services needed by consumers.

1. **Air Pumps must be available to all motorists.** Air Pumps must be functioning properly and be available for use during the hours of operation. Gas stations should have an air pump no further than 50 feet from the establishment and customers should have access to the pump without being required to obtain other services.
2. **Prices must be visible from the roadway.** Prices must be large and legible by motorists that are passersby for public safety. It is illegal to post incorrect prices, inaccurate price postings may result in fines or other repercussions.
3. **Prices must be visible on pump.** There is a special window displaying fuel costs per gallon. This window must be functioning at all times.
4. If the station offers full/self-service there must be a sign indicating the type of service available.
5. Gas Stations and establishments serving the public must be ADA compliant. ADA is the American Disabilities Act. See local ADA for more information on your rights. Contact the Department of Human Services or visit disability.gov.
